

# ActiveView

ActiveView is a modern, secure web application designed for monitoring the ActiveTrack tracker and the ActiveTrack Mobile application. Above all, you will appreciate the clarity, intuitive and easy operation. Graphical outputs from carrying out patrols with information about the course of the shift contribute to the simplicity of the work. With ActiveView, your team will be in control and you can guarantee how employee performance, as well as their safety at the workplace.

## ONLINE OVERVIEW

With ActiveView you have control room overview, in the office, on business trip or on vacation

## GEOFENCING

For monitored devices geofencing can be set and guard the abandonment marked locations

## GRAPHIC REPORTS

Thanks to the reports you will get immediate overview and in ActiveView you check them all discrepancy

## Safety features

In the online monitoring platform ActiveView, you check employees in the field, their work in real time performance and security. You can also check the trackers technical status like connection status, battery level and GSM signal strength. You can monitor multiple trackers and patrols at the same time and have an overview of employees on duty.
